StudySync

Turn Study Time into Game Time

Background

StudySync is a virtual study space that turns focus into a game—so independent studying feels immersive, rewarding, and community-driven.

What

Gamified study app where learners study together live, track goals, earn rewards, and become part of a community.

Why

Studying alone is unmotivating. Peer accountability + gamification + community makes focus stick.

Problem Statement

How might we reinvent self-learning so independent studying becomes as immersive, rewarding, and addictive as social media?

Who Feels It Most?

Students (13+)
High procrastination rates

Remote Workers
Focus drops at home

Distracted Minds
Need structure without pressure

Pain Points

- **Isolation:** Solo focus apps are silent, lonely, and easy to quit.
- **High Friction:** "Study together" options often require cameras (not everyone prefers this).

Market Potential (Global)

TAM (Total Addressable Market)

~916M Learners

Global learners 13+ (Secondary ~652M + Higher Ed ~264M)

SAM (Serviceable Available Market)

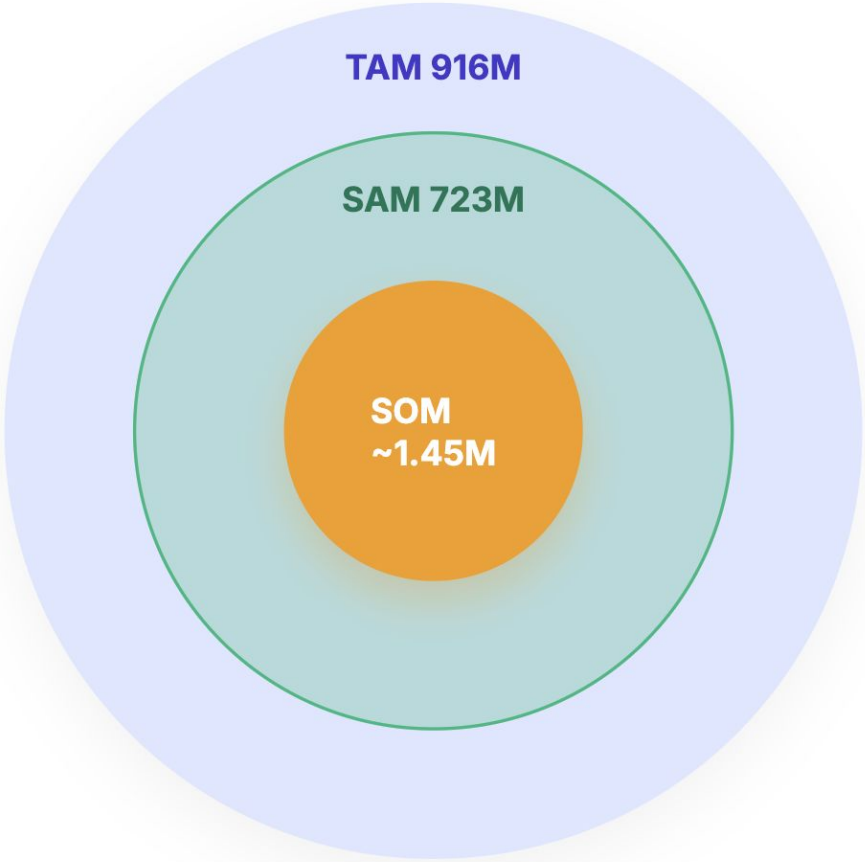
~723M Connected

~79% of ages 15–24 use internet globally (Proxy for connected learners)

SOM (Serviceable Obtainable Market)

~1.45M Active Learners

Realistic capture (0.20%) in 3–5 years.



Why attractive: Studying is a high-frequency habit, and our "study-together" loop compounds via friends + creators.

Sources: World Bank / UNESCO UIS via secondary pupils dataset; UNESCO higher-ed enrolment; International Telecommunication Union youth internet use; GSMA Intelligence mobile internet adoption.

Business Model

B2C (Consumer) CORE

Free

STARTER

US$0/mo

- Public study rooms + timer + goals
- Basic XP/streaks + basic stats
- Buy skins/maps (IAP)

Premium

CAFE PASS

US$3.99/mo

or US$29.99/yr

- **Cafe:** Follow system + chat + find buddies
- Create/join subject communities
- Private rooms with friends
- Advanced stats & Perks

B2B (Institutional)

Partnerships

PILOT

Partner with institutions to implement educational game experiences for specific courses.

Early Signal:
Partnership with NTU entrepreneurship program.

Traction (Today)

100+
App Downloads

10
Active Users

Power User Signal:
4 "obsessed" users averaging ~5 study hours/day.
(Early retention signal)

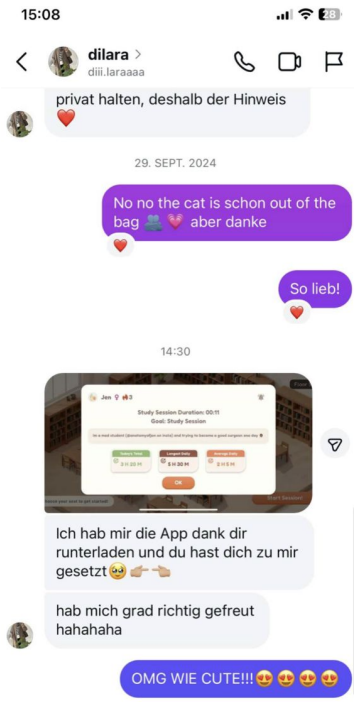
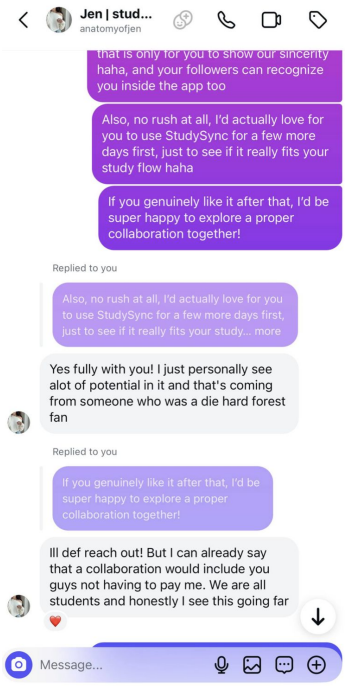
Hi there 👋
Thanks so much for reaching out!
StudySync honestly makes me feel more motivated to study. Especially when studying alone feels really unmotivating, studying "together" with you and Yifan somehow feels much happier. (It even feels like I'm studying with NTU students haha)
Everything has been great so far. If there's anything that could be improved, I think a few features would be really nice:

- **Offline / screen-off study mode**
  Sometimes I need to keep another device on with WiFi and the screen open, which drains the battery pretty fast. It'd be awesome if studying could continue offline or with the screen off.
- **A "finish studying" button**
  When I'm studying, I'm usually not focused on the app itself, so when the timer ends, I might not notice (I muted the sound). It'd be nice if the timer could keep running until the user clicks "finish studying". For example, if I plan to study for 1 hour but want to continue, it'd be great if I could just leave the timer running instead of setting up a new session again.

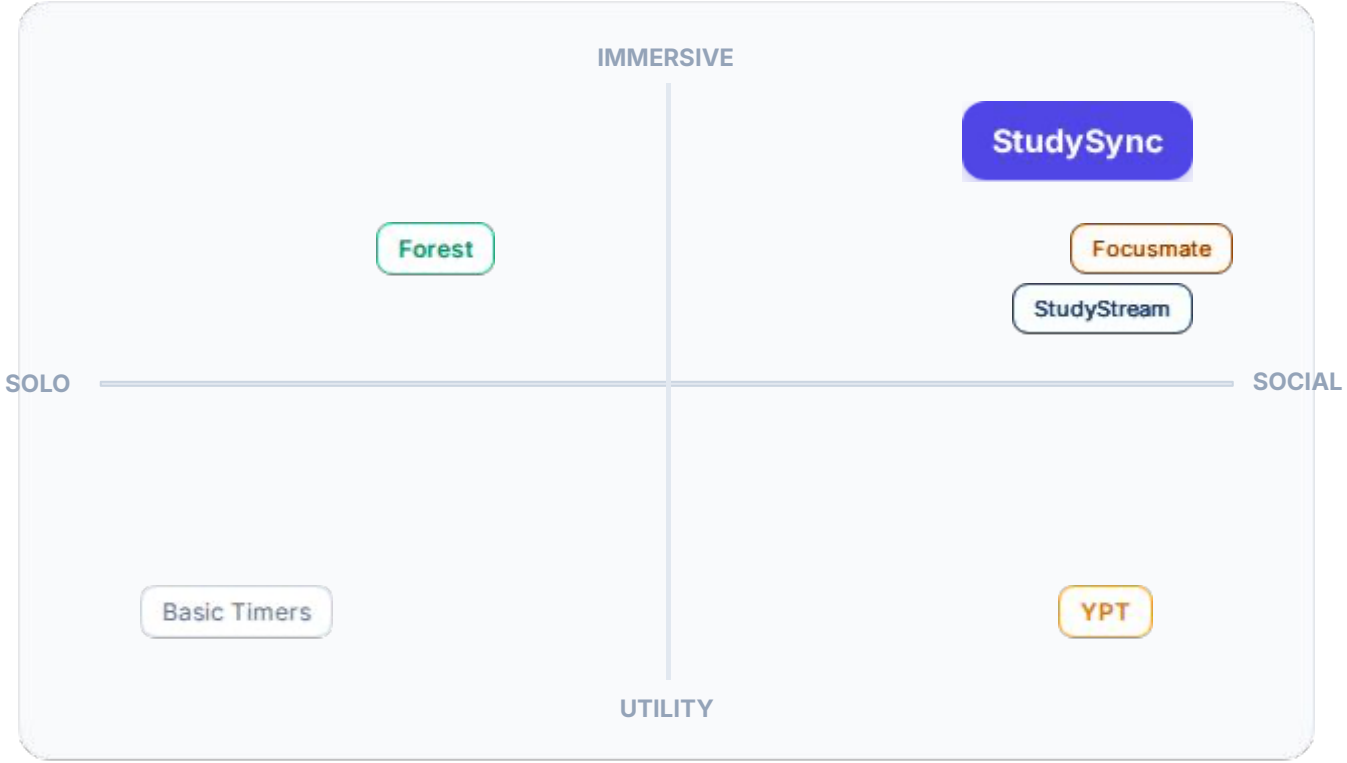
Other than that, there hasn't really been a moment when I felt less motivated to open the app; everything feels good so far. (I recently moved from my old account (guest...) to a new one named Shiro, it's still me ^^)
Thanks for sending me nudges. I really like the app and the idea behind it. Keep creating, innovating, and improving. I hope StudySync becomes super successful one day.
Good luck and thanks again! 🙏
Shiro





Competitive Landscape

StudySync sits at the intersection of social accountability + immersive gamification



Our Wedge

- **Low-friction togetherness:** Real “studying next to others” without forcing camera.
- **Identity + Retention:** Streaks, rewards, leaderboard, skins = emotionally rewarding focus.

Our Team

Near-Term Milestones

Jan 2026

- Released core free version to TestFlight and entered beta.
- Collected user feedback and fixed critical bugs.

Feb 2026 (Now)

- **App submitted to App Store** and currently under review.
- Preparing marketing launch to onboard first wave.

Q2–Q3 2026

- Collaboration with NTU: Gamified learning experience.
- Est. development timeline: ~4 months.

Q3–Q4 2026

- Launch premium features (e.g., Café building).
- Introduce monetization layer to the platform.
